## Military Fuel Handling Equipment

### Road Tanker Equipment and Fuel Pumping Modules

PTO or hydraulic driven self priming pump, emergency valves, bottom loading adapters, meter with air eliminator, mechanical or electronic meter register, hose reels, control valves, for general fuel supply and refuelling of armoured tracked vehicles inclusive special quick disconnect couplings

### Helicopter Refuelling Equipment and Modules

self priming pump, emergency valves, bottom loading adapters, filter water separator with all accessories, meters with mechanical or electronic register, in-line pressure and flow control, hose reels, control valves, special quick disconnect couplings, for single point pressure refuelling, hot refuelling or open line refuelling

### Mobile Pump Sets

Diesel driven self priming vane pump with filter water separator for helicopter and air craft refuelling, or filter air eliminator for fuel distribution and refuelling of armoured tracked vehicles. Meters with mechanical or electronic register, in-line pressure and flow control, hose reels, control valves, special quick disconnect couplings, for refuelling and fuel distribution

### Fuel Receiving Facilities

with filtration, air elimination and metering, mechanical or electronic register

### Bottom Loading Equipment

pantographs or bottom loading arms, flow and pressure control valve, air eliminator and meter with mechanical or electronic register

### Fuel Dispensing and Refuelling Equipment

designed to STANAG and MIL to meet the operational requirements of NATO forces

## Military Fuel Handling Equipment

### Proven Technology and Reliability

is assured because **Alfons Haar** manufactures the essential components and assembles the fuel handling equipment to specific user requirements to highest quality standards

### Modular System Technology

assures proven reliability, maximum operational capability, minimum weight, and minimum service cost

### Worldwide Spare Part Availability and Service

through world-wide sales and service network, guaranteed spare part availability for at least 15 years

### NATO Stock Numbers

use of Alfons Haar components which are NATO codified, and proven for years in industry and NATO operations

### ILS

detailed operating instructions and technical documentation complete with maintenance, service repair and retest instructions are standard supply; published spare part price lists permit direct purchase
